ARTIST BIOGRAPHY

Brian Comber is a fine arts painter and printmaker who creates provocative works with contemporary style and universal themes.

As a painter, Brian began with oils, often on very large canvases with both abstract and figurative themes. After years of painting exclusively in oils, he applied what he learned into the more demanding medium of watercolor, and as he

gained confidence his canvases again began getting larger.

His print-work combines the tactile element of intaglio with cerebral ideas that bring life and passion to the corporeal life envisioned in his work. By exploring the effect of lines on the plate, Brian defines a textured world of complex emotion and thought.

Literary, historical and subconscious sources inspire Brian to use the core emotions essential to basic humanity as a foundation for his work. The atmospheric spirit indicative of his art transcends literal interpretation and should be experienced aesthetically.
